Answer key - Biological Molecules

GCE Advanced Level - Biologie - Corrige

Detailed method for every exercise. Follow the substitutions line by line.
Corrige detaille de chaque exercice. Suis les substitutions ligne par ligne.

1. Which family is the main immediate source of energy for a cell?
Quelle famille est la principale source immediate d energie pour une cellule ?

- Carbohydrates / Les glucides *
- Proteins / Les proteines
- Lipids / Les lipides
- Nucleic acids / Les acides nucleiques

Answer: Carbohydrates
Carbohydrates such as glucose are the quickest source of energy.
Les glucides comme le glucose sont la source d energie la plus rapide.

2. What is the monomer of the carbohydrate polymer starch?
Quel est le monomere du glucide polymere qu est l amidon ?

- Glucose / Le glucose *
- Glycerol / Le glycerol
- Amino acid / Un acide amine
- Nucleotide / Un nucleotide

Answer: Glucose
Starch is a polysaccharide built from many glucose units.
L amidon est un polysaccharide forme de nombreuses molecules de glucose.

3. Proteins are polymers of which monomer?
Les proteines sont des polymeres de quel monomere ?

- Amino acids / Des acides amines *
- Glucose units / Des unites de glucose
- Fatty acids / Des acides gras
- Nucleotides / Des nucleotides

Answer: Amino acids
Amino acids are the monomers of proteins.
Les acides amines sont les monomeres des proteines.

4. Which two parts are joined to make a lipid?
Quelles deux parties s unissent pour former un lipide ?

- Glycerol and fatty acids / Glycerol et acides gras *
- Two glucose units / Deux unites de glucose
- Amino acids and peptides / Des acides amines et des peptides
- Two nucleotides / Deux nucleotides

Answer: Glycerol and fatty acids
A lipid is glycerol linked to fatty acids.
Un lipide est un glycerol lie a des acides gras.

5. What is the monomer of DNA?
Quel est le monomere de l ADN ?

Mega Mighty Sixers - contenu original, diffusion libre aux membres de l association

- A nucleotide / Un nucleotide *
- An amino acid / Un acide amine
- A monosaccharide / Un monosaccharide
- A fatty acid / Un acide gras

Answer: A nucleotide
DNA is a polymer of nucleotides.
L ADN est un polymere de nucleotides.

6. Iodine turns blue-black when it meets which molecule?
L iode devient bleu-noir au contact de quelle molecule ?

- Starch / L amidon *
- Protein / La proteine
- Lipid / Le lipide
- DNA / L ADN

Answer: Starch
Iodine detects starch, a carbohydrate.
L iode detecte l amidon, un glucide.

7. Which is the monomer of proteins?
Quel est le monomere des proteines ?

- Amino acid / Acide amine *
- Glucose
- Nucleotide
- Glycerol

Answer: Amino acid
Proteins are polymers of amino acids.
Les proteines sont des polymeres d acides amines.

8. Which molecule is the immediate energy source for cells?
Quelle molecule est la source immediate d energie des cellules ?

- Glucose / Le glucose *
- DNA / L ADN
- Amino acid / Un acide amine
- Fatty acid / Un acide gras

Answer: Glucose
Glucose, a carbohydrate, is used first for energy.
Le glucose, un glucide, est utilise d abord pour l energie.

9. Nucleotides are the monomers of which family?
Les nucleotides sont les monomeres de quelle famille ?

- Lipids / Les lipides
- Nucleic acids / Les acides nucleiques *
- Carbohydrates / Les glucides
- Proteins / Les proteines

Answer: Nucleic acids
Nucleotides build nucleic acids such as DNA and RNA.

Les nucleotides forment les acides nucleiques comme l ADN et l ARN.

10. A lipid is made from glycerol joined to which partner?
Un lipide est fait de glycerol uni a quel partenaire ?

- Fatty acids / Des acides gras *
- Amino acids / Des acides amines
- Nucleotides / Des nucleotides
- Glucose units / Des unites de glucose

Answer: Fatty acids
Glycerol plus fatty acids form a lipid.
Le glycerol et les acides gras forment un lipide.

11. How many families of biological molecules are described in this lesson? Give the number.
Combien de familles de molecules biologiques sont decrites dans cette lecon ? Donne le nombre.

Answer: 4
Four: carbohydrates, proteins, lipids and nucleic acids.
Quatre : glucides, proteines, lipides et acides nucleiques.
